Dear Tyler and DROP students,

I want to thank you for coming to the Environmental Sustainability Committee meeting today at such short notice and presenting your plans for the proposed collaborative festival and haunted walk event. We are encouraged by your enthusiasm and passion for the efforts that you do on this campus in the community. We are inspired by the creative energy that you put into the many events and projects that you work with and the efforts you take to make the world a better place!

As we mentioned at the meeting we are charting new territory with setting up best practices and procedures for campus land use, a charge given to our committee this year. The committee discussed the following regarding the proposed event:

- We are supportive of your motivation to hold an event to bring awareness to getting students out to vote, to bring awareness to the food forest and to support the efforts of the Dominican Republic Outreach Program (DROP).

- As we understand no impact will be made to conservation areas on campus.

- In terms of sustainability issues, you discussed awareness of the food forest, promoting the work that DROP does and including clean-up and recycling for the event.

- We strongly suggest that you have the proposed event plan and details reviewed by concerned constituencies around campus. This would include the Environmental Health and Safety office, Campus Police, the Food Forest Advisory Council, Physical Plant and Student Involvement office. These groups can better assess the direct impact to the area and provide guidance.

  - The Food Forest Advisory Council should determine feasibility and impact to the food forest and review the plan as they have a better understanding of this area and the environmental impact.

  - A safety and liability plan was included in your documentation, but Environmental Health and Safety should really review this as they are the safety and risk assessment experts on Campus.

  - Physical Plant should review your proposed event plan, site map and clean-up plan.

  - You should follow through with the proper Student Involvement and Event registration process.
Again I want to truly commend you and the students involved in your creative efforts and we appreciate you being proactive in responding to emails, agreeing to present at our meeting and including all of the stakeholders on campus so you can ensure you are successful in your endeavors. We would appreciate an update for our October 22, 2012 meeting, you can simply send an email with details or come for the last 10 minutes to give us an update.

Please let me know if you have any further comments or questions.

Thank you.

Sarah W. Davis, M.S.

Subject: Invitation to FGCU Land Use Survey - Please Complete before October 15, 2012

_Sent on behalf of the Environmental Sustainability Committee:_

**FGCU Land-Use Survey – Please Complete**

_A conversation about our campus lands and ecosystem_

Dear University Community,
The Environmental Sustainability Committee held two land forums in September, you may have remembered receiving the below email. We had decent attendance at these forums, but want to make sure that we are reaching out to our community and giving folks a chance to comment on FGCU land-use through a simple checkbox survey. This will give folks a chance to comment further and those that have not yet shared comments a chance to participate.

Please take some time to complete the following survey on our campus lands and ecosystems.

FGCU Campus Land-Use Survey
http://survey.fgcu.edu/Survey.aspx?s=d109c21fde77499e82913b9f6be02e39&
The survey will be open through October 15, 2012

Thank you!
