Although many university students navigate through these years with only minor or expectable psychological bumps and bruises, estimates are that about 10% of students seriously think about suicide each year. An even greater number—about half—of all students report feeling so overwhelmed at least once during the past school year that it was difficult to function. Being a university student can be puzzling, but there is help putting the pieces together.
**Indirect:**
- “I’m tired of life, I just can’t go on.”
- “My family would be better off without me.”
- “Who cares if I’m dead anyway.”
- “I just want out.”

**Direct:**
- “I’ve decided to kill myself.”
- “I wish I were dead.”
- “I’m going to commit suicide.”

BE AWARE OF VERBAL CUES
BE AWARE OF BEHAVIORAL CUES

- Any previous suicide attempt
- Acquiring a gun or stockpiling pills
- Co-occurring depression, moodiness, hopelessness
- Unexplained anger, aggression and irritability
- Drug/alcohol abuse, or relapse after a period of recovery
- Increase in risk taking behavior
- Sudden interest or disinterest in religion
- Change in sleep or eating patterns
- Decreased engagement in previously pleasurable activities or relationships
- Preoccupation with death or dying
- Facebook activity that suggests possible suicidal thoughts
BE AWARE OF ANY RECENT SITUATIONS

- Any recent trauma: Being expelled from school or failing grades; a recent unwanted move; relationship violence; death of a spouse, child, or best friend, especially if by suicide
- Loss of any major relationship
- Diagnosis of a serious or terminal illness
- Anticipated loss of financial security
- Fear of becoming a burden to others
BE ON THE LOOK-OUT

- Have you noticed a change in behavior?
- Is s/he isolating?
- Has s/he experienced a trauma?
- Is s/he abusing alcohol/drugs, increasing their use, or using in a high-risk manner?
HOW TO ASK ABOUT SUICIDE

- If in doubt, don’t wait, ask about suicide
- Tell your friend, "I am concerned about you" and ask how he or she has been feeling. Listen, offer support, and be understanding. You do not have to become that person's therapist, just be supportive.
- Talk to the person alone in a private setting
- Allow the person to talk freely
- Give yourself plenty of time
- Be persistent—this is important!
- Most attempts to offer help and support are met with relief, so don't be afraid to talk.
- However, do not agree to keep secrets.
- Remember to get help and support for yourself too.
You can be Less Direct:
- “Have you been unhappy lately?”
- “Do you ever wish you could go to sleep and never wake up?”
- “Have you been feeling so hopeless lately that you’ve been thinking about ending your life?”

Or You can be More Direct:
- “You know, when people are as distressed as you seem to be, they sometimes wish they were dead. I’m wondering if you’re feeling that way, too?”
- “You seem to be pretty miserable, I wonder if you’re thinking about suicide?”
- “Are you thinking about killing yourself?”
