

HIPAA Guidelines for Fieldwork

Per HIPAA guidelines, students cannot report this information in fieldwork assignments such as case studies presentations:

- Name
- Location - includes anything smaller than a state, such as street address
- Dates - all, including date of birth, admission and discharge dates
- Telephone numbers
- Fax numbers
- Electronic e-mail addresses
- Social security numbers
- Medical record numbers
- Health plan beneficiary numbers
- Account numbers
- Certificate and/or license numbers
- Vehicle identification numbers and license plate numbers
- Device identifiers and their serial numbers
- Web Universal Resource Locators (URLs)
- Internet Protocol (IP) address numbers
- Biometric identifiers, including finger and voice prints
- Full face photographic images and any comparable images
- Any other unique identifying number, characteristic, or code.

For written reports, the following information **can** be shared:

- Age (age 90 and over must be aggregated to prevent the identification of older individuals)
- Race
- Ethnicity
- Marital Status
- Codes (a random code may be used to link cases, as long as the code does not contain, or be a derivative of, the person's social security number, date of birth, phone/fax numbers, etc.)

Students, as well as therapists, often keep "working files" in their desk. This is still allowed under HIPAA guidelines, however this information must be locked in a file cabinet when not in use, and must be shredded when no longer needed.
