College Reach-Out Program & Scholars Club

2009 Summer Institute
This year, the Summer Institute prepared students for success in their upcoming school year through an exciting week-long schedule of learning and personal growth. Focus was placed upon the development of stronger math and reading skills.

After their math and reading work, student’s participated in activities involving challenging hands-on exploration of several engineering fields.

To punctuate the academic rigor, students enjoyed several afternoons of recreation. FGCU Campus Recreation facilitated a great game of flag football, and on another afternoon, students went swimming at FGCU’s North Lake Village’s pool.

Summer Institute ended with a trip to Fort Lauderdale’s Wannado City. There, students explored many career opportunities through role play. Everyone had a great time.
