**How to Calculate your GPA**

**Quality Points:** each grade you’ve earned has a certain number of quality pt’s. Multiply each credit hour by the earned quality point listed below (i.e., a 3 credit class with a grade of an A would total 12 quality points for that class)

- A=4.0 pt’s
- A- = 3.7 pt’s
- B+= 3.3 pt’s
- B=3.0 pt’s
- B- = 2.7 pt’s
- C+= 2.3 pt’s
- C=2.0 pt’s
- C- = 1.7 pt’s
- D+= 1.3 pt’s
- D=1.0 pt
- F, W or I = 0 pt’s

1. **Calculate your Semester GPA:** Add up the total number of quality points from each class; divide this # by the total number of credit hours attempted.

2. **Calculate your Cumulative GPA:** Add this semester’s quality points to the total quality points earned so far at FGCU. Then multiply this total with the total number of GPA credit hours earned at FGCU, by adding this semester’s completed credit hours to previous completed credit hours. Then divide the total quality hours by the total number of credit hours attempted at FGCU.

*If you need information on how many credit hours and quality hours you’ve accumulated thus far at FGCU, please inquire downstairs in the Admissions/Registration Office.*
