7. President’s Report – President Wilson G. Bradshaw

President Bradshaw reported on the upcoming grand openings of some of our new buildings and stated we are able to have Sugden Hall, Lutgert Hall and Holmes Hall
because of the great generosity of people here in this region. He stated FGCU stands out as a shining example when we look at local support of universities and the use of the matching program.

President Bradshaw reported that this fall we reached a milestone in our enrollment, with a student body of over 10,000, and as of yesterday, our student enrollment headcount was 10,219. He stated this number shows FGCU’s significant growth pattern since the University opened in the fall of 1997 when we had 2,584 students. The breakdown of our enrollment this fall is 8,685 undergraduate, 988 graduate students, and 546 non-degree seeking students. He stated the overwhelming majority of these students come from Southwest Florida. The fall enrollment headcount is up 9% as compared to last year. President Bradshaw stated we are especially pleased with a 20% increase in our graduate student population and that FTE fall enrollment is up 12.5% as compared to last year. He reported we started two new graduate programs this fall, Doctorate of Physical Therapy which has 23 majors and our new Education Specialist Program with 17 majors.

President Bradshaw reported we opened the first phase of our new student residences this fall with Everglades Hall. He stated that it is designed specifically to enhance the first-year experience of our students. We have made significant progress on the second installment of housing in the southern part of campus which will be named Biscayne Hall. President Bradshaw stated Biscayne Hall will be our first LEED certified building and will have solar thermal to heat hot water.

President Bradshaw reported that we are continuing to collaborate with Edison State College on programs that would be mutually beneficial to our respective institutions, but more importantly, to the people in Southwest Florida. He stated he has enjoyed a great working relationship with Dr. Walker and we continue to collaborate on enhancing educational opportunities for students within our region.

President Bradshaw reported that during the 2008 Legislative Session, FGCU was successful in obtaining $8.5 million to construct a solar field. He stated that in partnership with Regenesis Energy Services, FGCU will build two megawatts of solar arrays throughout the campus to significantly decrease the University’s dependence on nonrenewable energy sources. He stated this $17 million endeavor will make the FGCU solar project one of the largest in the world for a university. The solar panels will be placed on top of buildings and parking garages and on buildable land on campus. President Bradshaw stated the impacts of the solar project include the removal of an estimated 9,000 pounds of nitrogen oxide, over 14,000 pounds of sulfur dioxides, and over 5.1 million pounds of carbon dioxide annually from being introduced to our environment through conventional fuels. He stated the further renewable initiatives of solar thermal in the next phase of student housing to be completed fall 2009, and continued research, expansion, and implementation of other renewable energy technologies. The groundbreaking for the solar project will be October 28th and all Trustees are invited.
President Bradshaw reported there has been another great distinction by the Florida Gulf Coast College of Business as the Lutgert College of Business is recognized once again as one of the best business schools in the nation according to The Princeton Review. He stated the New York based education services company features the Lutgert College of Business in the recently published 2009 Edition of its best 296 business schools. President Bradshaw reported that the Lutgert College of Business was noted also in the 2007 edition. He stated according to the vice president of the Princeton Review, “We select schools for this book based on our high regard for their academic programs and the offerings, institutional data we collect from the schools and the candid opinions of students attending them who rate and report their campus experiences at the school.” President Bradshaw stated that Dr. Pegnetter is the founding Dean of the Lutgert College of Business and because of his visionary leadership, the hard work of the faculty, and success of our students, we have built a stellar college of business—one that we should all be very proud of. President Bradshaw stated that he would like to acknowledge the leadership that Dr. Pegnetter has shown over the years in making the Lutgert College of Business what it is today.

President Bradshaw reported that last weekend was family weekend and because of the hard work of faculty, staff and students, it was a rousing success. He stated we had over 240 families and approximately 1500 people showed up for this event. President Bradshaw acknowledged Dr. Rollo and his team who put this program together. President Bradshaw stated the parents and students he spoke with are very pleased with the educational experience.

President Bradshaw stated that he wanted to officially greet the new Provost and Vice President for Academic Affairs, Dr. Toll, who is attending his first Board of Trustees meeting. President Bradshaw stated Dr. Toll’s leadership is already being felt here at the University.
